

# Implant Maintenance: The Implant is Restored, Now What?

In Association with **Dr. Arsalan Ahani**

Thursday, February 8, 2018

## PROGRAM DESCRIPTION

Dental implants are now the standard of care for patients with missing teeth. As the number of cases increases, it is essential to communicate ideal dental care following implant placement. The dental hygienist is often recognized by the patient as a trusted mentor and a go-to advisor once a patient faces treatment options. This course emphasizes the hygienist's role in pre-, intra- and post-treatment to minimize infection and potential complications.

Evidence-based decision making including safety and efficacy of instruments used in maintenance will be discussed. This presentation will review current literature on instrumentation as well as biocompatibility of materials on titanium and zirconia surfaces.

## LEARNING OBJECTIVES

- Identify basics of implant types and components
- Understand biocompatibility of materials related to implant maintenance
- Understand the current literature on proper instrumentation and maintenance
- Develop decision tree to evaluate health and disease around dental implants
- Identify potential complications and risks in pre- and post-operative care

## SPEAKER

Kathi Carlson, CDA, FADIA, is a graduate of Indiana University's Certified Dental Assisting Program, and has been in the profession of dentistry for many years with the last 25 focused on implant dentistry. She is the creator of "The Implant Consortium" and has trained implant teams nationally, as well as throughout the international dental community. Kathi is a credentialed and charismatic facilitator, offering referral programs on case presentation and the team approach to implants, as well as clinical and implant coordinator development programs that are always cutting-edge, engaging, informative and high energy! She is a Fellow and a founding Certified Educator for the Association of Dental Implant Auxiliaries (ADIA) and was the recipient of the ADIA's Educator of the Year Award in 2008. Kathi has contributed to and co-authored several implant training manuals. Her passion is patient communication, case presentation and working with referring teams to help better understand and appreciate the benefits of implants.
